

Making the Web a Prettier Place

Presented by Sarah Vessels

University of Kentucky Computer Science

References from the Presentation

- <http://freewebs.com> - FreeWebs, a site that offers free web space for you to put your site.
- <http://www.editpadpro.com/editpadlite.html> - EditPad Lite, a free all-purpose editor for Windows that you can use to write HTML and CSS files
- <http://tacosw.com/> - Taco HTML edit, a free HTML and CSS editor for Mac OS X.
- <http://bluefish.openoffice.nl/> - Bluefish, a free HTML and CSS editor for Linux. This is my personal favorite HTML editor for Linux.
- <http://filezilla-project.org/> - FileZilla, a free FTP client for Windows, Mac OS X, and Linux. This is how you'll upload your files to your web space.
- <http://www.w3.org> - World Wide Web Consortium, a standards body responsible for defining the rules of languages like HTML and CSS.

Learning Resources

- <http://www.tutorialtastic.co.uk> - Tutorialtastic, a web site with many tutorials on HTML and CSS, going from complete beginner to more advanced tutorials.
- <http://htmldog.com> - HTML Dog; contains beginner-to-advanced HTML and CSS tutorials.
- <http://opendesigns.org> - Open Designs; one of the ways I learned HTML and CSS was by looking at the source code of other people's pages. Open Designs offers already-made page templates that you can download and either use as-is on your site or edit to suit you. Just by looking through the code, you're bound to learn something about web design.

Already Know HTML and CSS? Improve Your Technique

- <http://www.webstyleguide.com> - Web Style Guide
- <http://www.alistapart.com> - A List Apart; excellent articles on web design, interface design, typography, accessibility, and usability.
- <http://www.alvit.de/handbook> - Web Developer's Handbook, a huge collection of links to various sites about web design, HTML, and CSS.
- <http://www.dailyblogtips.com/43-web-design-mistakes-you-should-avoid/> - 43 Web Design Mistakes You Should Avoid
- <http://www.css-galleries.com> - CSS Galleries; get inspiration by seeing some of the prettiest sites out there.
- <http://www.csszengarden.com> - CSS Zen Garden; a source of inspiration because it showcases the amazing changes you can make to the appearance of a page just by changing its CSS, leaving the HTML the same.
